PROFESSIONAL SUMMARY

Final-year Artificial Intelligence and Machine Learning engineering student with hands-on experience in Machine Learning, Deep Learning, Python, Data Analysis, Computer Vision, and AI model development. Experienced in developing regression, classification, recommendation, and object-detection solutions using Python-based machine learning libraries and computer vision frameworks. Strong foundation in Python, NumPy, Pandas, Scikit-learn, TensorFlow, OpenCV, SQL, data structures, and databases, supported by academic projects in AI-driven computer vision and Quantum-AI. Seeking an entry-level AI/ML Engineer, Machine Learning Engineer, or Data Science role focused on developing practical, real-world AI solutions.

CORE COMPITENCIES

Machine Learning | Deep Learning | Artificial Intelligence | Computer Vision | Python Programming | Data Analysis | Regression & Classification | Recommendation Systems | Object Detection | Model Development | Feature Extraction | Image Processing | SQL & Databases | Data Structures & Algorithms | OOP | AI Model Optimization

ACADEMIC PROJECTS

HYBRID QUANTUM-AI FOR BRAIN TUMOR ANALYSIS

Feb 2026 - Present

* Developed a hybrid AI framework for real-world brain tumor analysis using MRI images from the BraTS2020 dataset.
* Implemented U-Net with ResNet for brain tumor segmentation and CNN with EfficientNet-B0 for feature extraction.
* Developed a QCNN-based classification model using PennyLane to classify Glioma, Meningioma, and Pituitary tumors.
* Applied image preprocessing and deep learning techniques to improve MRI analysis and model performance.
* Designed an end-to-end system for MRI analysis, tumor segmentation, classification, and result visualization.
* Developed the framework with potential application in AI-assisted medical image analysis and clinical decision-support systems.

DETECTION OF SHIPS AND BOATS IN COASTAL AREAS USING GROUND-LEVEL IMAGES

Sep 2025 - Dec 2025

- Developed a real-time ship and boat detection system using YOLOv8 and OpenCV for ground-level coastal camera feeds.
- Built and annotated a custom dataset to support object-detection model development.
- Implemented computer vision techniques for identifying ships and boats in coastal environments.
- Developed the solution with applications in AI-based coastal surveillance.

PROFESSIONAL EXPERIENCE

MACHINE LEARNING INTERN

COGNIFYZ TECHNOLOGIES

- Developed regression, recommendation, and classification models using restaurant-related datasets to support predictive analysis and personalized recommendations.
- Applied Python, Pandas, NumPy, and Scikit-learn to build and evaluate machine learning solutions.
- Performed data processing and analysis to prepare datasets for machine learning model development.
- Worked on machine learning workflows involving model development, prediction, and performance improvement.

TECHNICAL SKILLS

Programming Languages: Python, C, JavaScript

AI / Machine Learning: Machine Learning, Deep Learning, Regression, Classification, Recommendation Systems, Computer Vision, Object Detection, Model Development

Libraries & Frameworks: NumPy, Pandas, Scikit-learn, TensorFlow, OpenCV, YOLOv8

Databases: MySQL, MongoDB, SQL

Web Technologies: HTML, CSS

Tools & Platforms: Git, GitHub, VS Code, Power BI, Tableau

Core Concepts: Data Structures, Object-Oriented Programming, Data Analysis

EDUCATION

B.E. — Artificial Intelligence & Machine Learning

Srinivas Institute of Technology | Visvesvaraya Technological University|Manglore

CGPA: 7.49

CERTIFICATIONS

AWS Academy Cloud Foundations — AWS Academy | 2025

Advanced Python — Ethnotech Academic Solutions | 2024

ACHIEVEMENTS

2nd Place — Startup Sparks Innovation Event, AISE & ACODE | 2025

Prototype Refinement Phase — Google Cloud Gen AI Exchange Hackathon | 2025

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Event Coordinator — AIML Department

- Coordinated and managed departmental technical and academic events.
- Successfully conducted Code Clash, a technical event involving 50+ participating teams in 2025.
- Supported event planning, coordination, execution, and departmental workshops.
- Assisted with event and workshop photography and documentation.
